

## Introducing Rosalind Lite

Rosalind Lite is a simple snapshot lighting controller built into a button station.

8 DMX snapshots are programmable using any DMX source, with expanded features programmable via RDM.

Additionally, the controller can be used in situations where pass-through DMX is needed. If a DMX signal is present on the input (i.e., a console is connected), Rosalind Lite will just pass the data through. If signal is lost, it'll return to playing its presets.

## Key Features

### Specs:

- 8 RGB-backlit buttons
- Fits in a standard 1-gang backbox
- (2) 3.81mm Phoenix connectors for DMX in & out
- Power is 12-50VDC
- Standard in white or black with screwless cover plate
- Custom engraved keycap sets available, sold separately

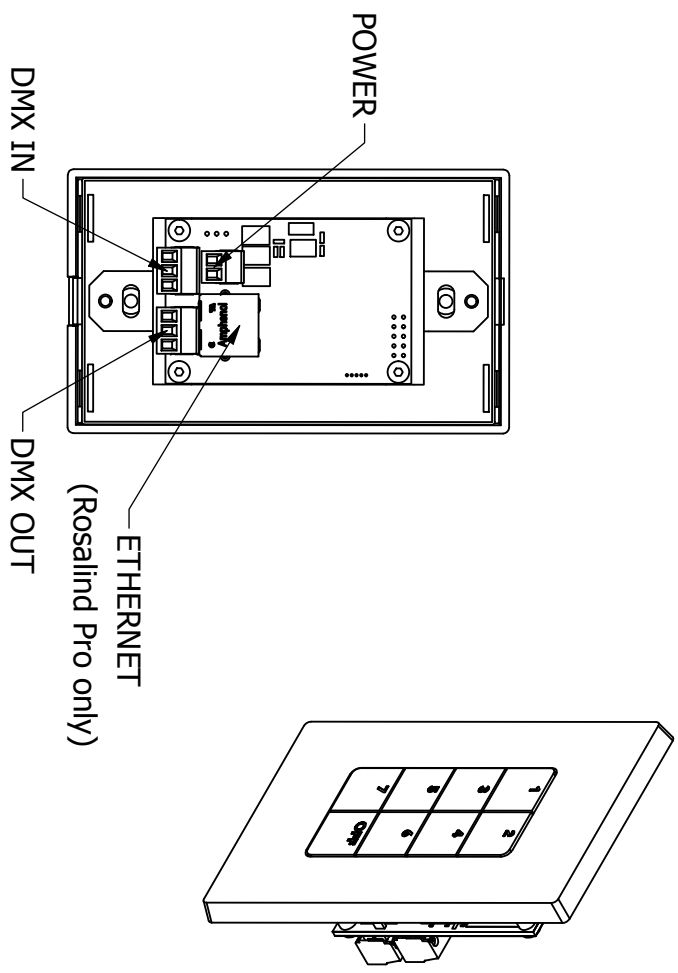

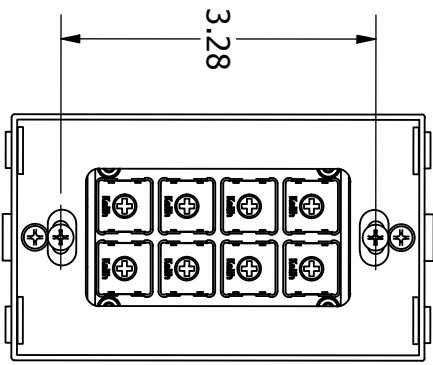

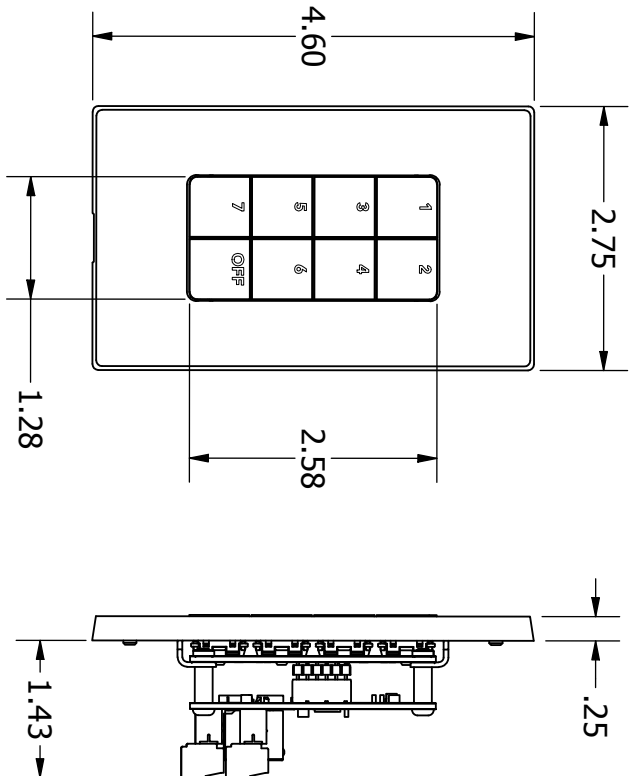

### Features:

- Snapshots can be pile-on with highest-takes-precedence or one-at-a-time
- Optional DMX pass-through overrides preset functionality when signal is present
- Button colors can be globally programmed
